PAPE SUBWAY STATION

TORONTO TRANSIT CORPORATION

Pape Station
Etched granite
frieze.

Pape Station Art Introduction

The artwork in Pape Station is derived from two key sources:

1. Interior architectural features of the station before modernization
2. Urban features of the neighbourhood

The artworks, through image variations, act as slices of time and reminders of past moments in the life and context of this public space and its environs.

Moving from a representational image, through a series of variations, a visual narrative is expressed that delights the eye and metaphorically provides a journey of exploration for the viewer.
